

# CAMI Newborn, 6-Month-Old or 20 lb Infant

Newborn (Model 126-0000) 6-Month-Old (Model SA-100I-000) 20 lb (Model 530-0000)

The CAMI (Civil Aeronautical Medical Institute) Newborn Infant and 6-Month-Old Infant ATDs were developed for the evaluation of child restraint systems as defined in CFR 49, Part 571, Standard No. 213.

The dummies consist of steel and aluminum weights attached to leather skeletons wrapped in layers of foam padding and covered with a stitched cloth outer shell.

The CAMI 20 lb is a weighted version of the CAMI 6-Month-Old. It has a 20 lb minimum weight to test the upper limit of infant car seats.

*The CAMI New Born Infant ATD is specified under Title 49 CFR Part 572, Subpart K.*

*The CAMI 6-Month-Old Infant ATD is specified under Title 49 CFR Part 572, Subpart D.*
